

The products of G. N. Raymond Limited — Engineering Division have maintained a prominent and enviable position in the Hardware and Tool Trade of Australia, New Zealand and many Overseas Countries.

The policy adopted by the Company of constant endeavour by test and research to incorporate and maintain the highest standards of strength and durability, gives assurance to Distributors to confidently and conscientiously recommend 'DAWN' Tools and equipment.

The development of modern engineering demands maximum strength by scientific design and correct metallurgical practice and these principles are embodied in the fabrication of 'DAWN' products.

This particularly applies to the very large range, comprising over eighty sizes and types of 'DAWN' Vices, wherein with fifty years of investigation and experience these essential qualities are achieved without recourse to old-fashioned methods of bulky dimensions and unnecessary weight.

'DAWN' Vices are amply and correctly proportioned, and are designed to distribute the factors of stress and leverage, without imposing excessive strain at any particular point.

The high tensile castings, generally termed Semi-Steel, are made in our own foundry and are subject to periodical tests, both physical and analytical.

All 'DAWN' products are unconditionally guaranteed against faulty material and workmanship.

The G. N. Raymond Limited — Engineering Division is appreciative of the responsive support, accorded by both Merchants and Users, to its policy of producing an All-Australian article to compare with the world's best.

# \* WIRE STRAINER

(Code 9129)

Weight: 1 lb. (0.45 Kg.)

A steel pin to suit is supplied with strainer.

# RELIABLE "Dawn" PRODUCTS

# **★ QUICK ACTION CLAMPS**

- ★ A very useful clamping medium used by Carpenters, Cabinetmakers, Engineers, Welders, Boilermakers, etc.
- ★ A Self-locking Tool with pressure adjustable, either Light or Heavy, by unbreakable Plastic Handle.
- ★ Instant adjustment to required capacity.
- ★ Size of Clamp indicates capacity.

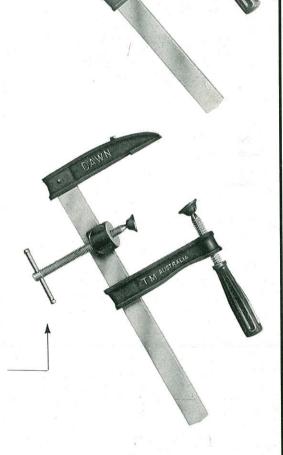

6" (152 mm) — 8" (202 mm) is 1" (25 mm) x 1/4" (6 mm) bright Steel Bar with bevelled and serrated edge. Sizes above 8" (202 mm) use 11/4" (32 mm) x 1/4" (8 mm).

★ Individually cartoned in attractive Boxes with illustrations of Clamp on front and usages on back. Labelled each end for shelf display. Dawn Red gloss finish.

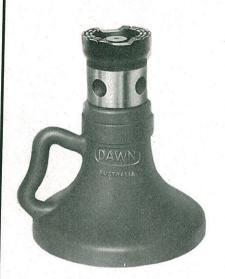

**E.M. ATTACHMENT** (Extension Medium) illustrated, attached to Steel Bar of Clamp for use when pressure is required at right angle to Clamping pressure. Fits T.M. Clamps only.

# \* PIPE CUTTER

o. 28 (Code

(Code 4028)

Weight 31/2 lbs. (1.6 Kg.)

No. 28/6 Spare Wheels are readily available.

### **HEAVY DUTY PIPE CUTTER**

A  $\frac{1}{2}$ "-2" (13 mm-51 mm) capacity tool, designed and built to withstand continuous, gruelling hard work.

Extra strong magnesium alloy construction and hardened steel thread insert make light work of heavy cutting.

# **★ LINK TYPE CAST IRON PIPE CUTTER**

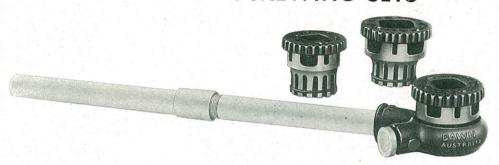

No. 51 (Code 4051) Weight 6½ lbs. (2.9 Kg.) 51/6 Spare Wheels available.

## 2"-6" (51 mm-152 mm) CAPACITY CAST IRON PIPE CUTTER

The lightest, fastest and most compact C.I. pipe cutter on the market. By adding links and wheel units, cutting capacity may be increased to handle pipes up to 12" (305 mm) diameter.

# \* RATCHET SCREWING SETS

No. 26 No. 27 (Code 4026) (Code 4027) 1/2"-3/4" (13 mm-19 mm) BSP

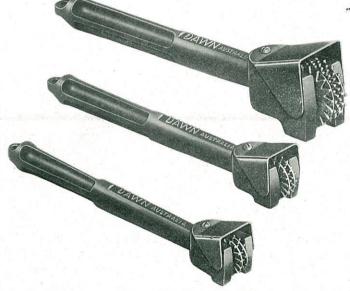

½"-¾"-1" (13 mm-19 mm-25 mm) BSP

Weight 9 lbs. (4.0 Kg.) Weight 11 lbs (4.9 Kg.)

- \* Acclaimed by plumbers throughout Australia as the most accurate, easiest-to-operate, lightweight and compact pipe threader available.
- ★ Ideal for close corners . . . will cut really smooth, clean threads quickly and accurately even with swinging space reduced to 30°.
- \* Engineered chaser dies make for cleaner threads with half the effort.

# \* EMERY DRESSER

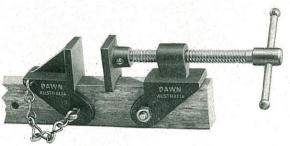

Size	Code No.	Weight lbs.	Weight Kg.
No. 0	9200	13/4	0.8
No. 1	9201	23/4	1.2
No. 2	9202	6	2.7

These patterns of Emery Wheels are recommended for general purpose wheel dressing, where it is essential to keep the wheel face open. Red gloss finish. Spare Wheels readily available.

# RELIABLE "Dawn" PRODUCTS

# \* CRAMP HEAD **FITTINGS**

(Code No. 9205)

These fittings can be readily mounted by the user on a 2" x 1" (51 mm x 25 mm) or 3" x 1" (76 mm x 25 mm) hardwood batten of any length, thereby providing a cramp of whatever capacity is desired.

Size of Jaws: 134" (44 mm) x 15/8" (41 mm). Weight: 3 lbs. (1.4 Kg.)

# \* POLISHING HEAD

(Code No. 9173) Double end grinding spindle. Two sets of flanges to take  $\frac{3}{4}$ " (19 mm) thick grinding wheels.

Weight: 5 lbs. (2.3 Kg.)

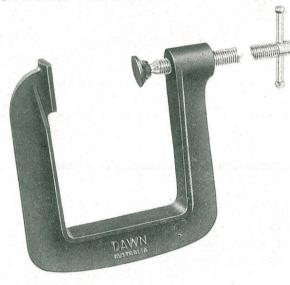

## \* DEEP THROATED CLAMP

(Code No. 9221)

(D.4)

Specially designed for Boat Building, Boiler-making, Truck Body Building, etc., where a Deep Throated Clamp is required.

- \* Steel Casting of Heavy Section.
- ★ Machine Cut Screw with Swivel Button.
- ★ Size denotes Maximum opening in inches and millimetres.
- ★ Throat depth, 61/4" (158 mm).
- \* Attractive "Dawn" Gloss Red Finish.
- ★ WEIGHT, 5¾ lbs. (2.6 Kg.).

# \* STRAP WRENCH

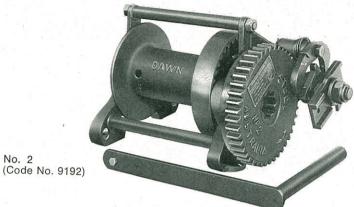

No. 50 (Code 4050) Weight: 8 oz. (0.2 Kg.)

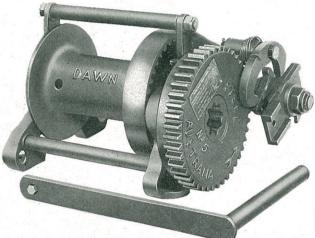

1/2"-2" (11 mm-51 mm) Capacity.

With Alloy Handle and Woven Strap to obviate marking chromeplated fittings.

# \* ALL STEEL HAND WINCHES

No. 5 (Code No. 9193)

MANUFACTURED TO AND APPROVED BY LIFTS AND CRANES REGULATIONS AND TO S.A.A. CRANE AND HOIST CODE.

For Tow Trucks, Carriers, Builders. Structural and Industrial Engineers. Factories, Warehouses, Store Yards, etc.

## FULLY APPROVED FOR MOUNTING ON VEHICLES

Constructed throughout of High Grade Electric Cast Steel (minimum 45 ton Tensile strength) designed without keys or set screws to shear or strip.

Generously proportioned anti-friction White Metal Bearings. (No. 2 Replaceable bronze bushes.)

No. 2 and No. 5 Winches are fitted with an Automatic Safety Load Brake which applies, whilst under load, immediately the operator releases the winding handle.

Construction of these Winches, if maximum amount of Cable is required, allows the operator to disengage the pinion, thereby giving free run out of Cable, obviating manual

Another feature of these Winches is the simplicity of operation whether raising or lowering by just turning the handle in the direction required without manually releasing any locking mechanism.

The Brake is of a Weston Screw type so designed that at no stage or position can the Double Acting Pawl be disengaged; therefore the Pawl does not rely on a spring for engagement (this ensures maximum safety).

Brake Lining is of selected disc fibre giving maximum wear and efficiency. Water or oil will not impair Brake operation.

Full Technical Specifications overleaf on page 22.
