

DAWN Hold Down Table Clamp - 125mm

- Made from Ductile Iron.
- Heavy ribbed frame for strength and durability.
- Whitworth thread for fine adjustment.
- Rotates 360 degrees around the holding bolt. Zinc plated corrosion resistant screw and swivel pad to accommodate uneven surfaces.
- Ideal for woodwork and metalwork, milling, routing, machining, drilling workbench jiggging applications where positive strong and secure clamping is required.
- Distinct advantage over conventional clamps and vices which function only near the edge of a workbench or table.

Part No	Description	Hold Down Height (mm)	Throat Depth (mm)	Flame Proof Load (kgs)	Weight (kgs)
