

DUAL ACTION SASH CLAMPS

The new dual action sash clamps are designed and manufactured in Australia. Unlike other brands in the market, these DAWN clamps come with several unique features which would delight every woodworker.

Features and Benefits

- Jaws can be reversed to enable the clamp to be used as a clamp (B) or a spreader (A).
- Extra jaw depth enables clamping (C) or spreading (E) underneath the bar.
- Extra jaw width enables clamping (D) or spreading (F) on the side edge of the jaw.
- Spring loaded ball in securing pin prevents it from accidentally sliding out from the steel bar.
- Jaws are made from unbreakable super tough ductile (S.G.) iron.
- Flat bar manufactured from premium quality steel to ensure longer life

Part No.	Jaw Opening Size(mm)	Bar Length (mm)
61241	460	610
61242	610	760
61243	760	915
61244	915	1070
61245	1070	1220
61246	1220	1370
61247	1370	1680
61248	1680	1810
