

Quick Gear Clamp

- The distinctive design of this clamp allows for rapid action clamping.
- The ratcheting handle applies maximum pressure to the work piece.
- The ratchet and lever mechanism means that just a small effort produces a large amount of clamping pressure.
- This rugged clamp can be used for both wood working and metal working applications.
- With a quick push on the “power bar” the gear clamp develops up to 275kgs of clamping force.
- Handy quick release button releases the clamp instantly.
- Strong carbon steel bar, heat treated and coated with black oxide to prevent rusting.
- The body is a sturdy construction of die cast Aluminium Alloy / Steel.
- The jaw comes with a soft jaw pad for wood working applications, which can be removed for welding applications.

Part No.	Description	Jaw Opening max. mm	Throat Depth (mm)	Clamping pressure kgs
61120	Quick Gear Clamp 100mm	100	85	275
61122	Quick Gear Clamp 200mm	200	85	275
61124	Quick Gear Clamp 300mm	300	85	275
